raaco utility carts

raaco sets the standard in storage

Designed by professionals for professionals, our highly sustainable, configurable storage solutions are built for the rigour of high-performance environments.

raaco utility carts

Building on successful systems originally developed for aerospace applications, the **new utility cart** range is designed to simplify the transportation and storage of materials and tools, for manufacturing, maintenance and materials management applications.

The compact, lightweight and robust aluminium construction provides **a versatile platform** with a range of compartment solutions and accessory options.

The range is designed both to integrate with essential raaco products, including the award winning CarryLite organizers, and provide **highly mobile** alternatives to classic utility cart solutions.

Danish since forever

raaco utility carts are **designed** and manufactured in Nykøbing Falster, **Denmark**.

Created with an emphasis on **simplicity, durability, sustainability and flexibility**.

raaco products are relied upon across the globe, from small enterprise to high-performance global organisations, including Formula One teams, defence, and aerospace manufacturers.

Danish since forever

With a compact footprint and low resistance castors the utility carts are highly manoeuvrable, suited to the confined spaces of production lines, aerospace manufacturing and automotive workshops.

The worktop, with removable non-slip rubber matt and rear panel, provides the perfect workspace to operate from when preparing subassemblies or accessing organizers.

Perforated panels, compatible with raaco SuperClip accessories, present the opportunity to configure the cart for a specific application, maximising performance.

CarryLites

CarryLites and the CarryLite compartment

The utility carts are perfectly configured for CarryLite 5x10 organizers. Each compartments formed by two aluminium runners with a capacity of 20kg, minimising weight and featuring a stepped front edge to retain the CarryLite during transportation.

Highly durable, impact-resistant, CarryLite organizers are constructed from high-grade polycarbonate and polypropylene suitable for the harshest working environments.

Configurable with the range of raaco inserts, and with transparent lids they are a marque solution for organising and transporting components and tools with an unrivalled range of features and options to meet the demands of professional applications.

Optional Features include:

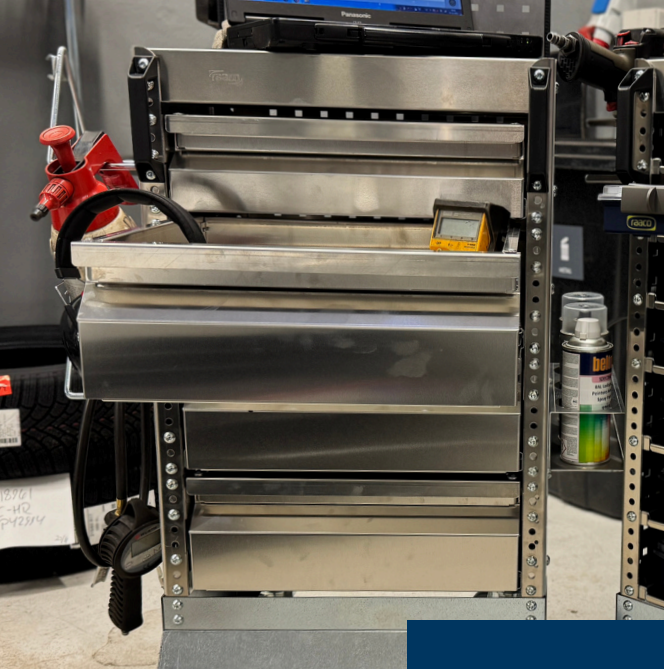

Sandwich double-lid, with space to store and display a plan of the content for quick identification or installation instructions to aid efficiency at the point of use.

Location management system (LMS), combined with CA-inserts that lock into the LMS click'n grid to firmly retain them in place.

Fluorescent material variants to aid visibility using black light (UV-light), essential for FOD (Foreign Object Detection) in aerospace and similar applications.

Danish since forever

Aluminium Drawers

Available in two sizes, shallow (110mm) and deep (150mm) the aluminium drawers feature a recessed handle release for the transportation locking mechanism.

The drawers are design to open fully to provide 100% access to the 375mm x 330mm opening with 20kg capacity.

The shallow drawer is suitable for a range of hand tools and materials whilst the deep drawer will comfortably accommodate power tools and small diagnostics equipment.

Drawers & shelves

Aluminium Shelves

Full width Aluminium shelves feature a stepped front edge to prevent contents from spilling when moving the cart, each with a load capacity of 20kg.

They have an accessible width of 425mm with heights that can be set in 20mm increments offering scope to accommodate a range of materials, tools or diagnostics equipment.

By design they are perfectly sized for two Bin 4 or two Shelf Bin 6-1100 units placed side by side, a perfect transportation solution to compliment to storerooms with these, or similar parts bins.

Custom configurations

Whilst the core range of five carts are designed to meet the needs of most likely applications, the utility cart platform has been designed with our core philosophy for configurable storage solutions.

The three compartment options can be specified and positioned to create a bespoke solution that more effectively meets a specific need or application that an organisation may require.

Bespoke configurations of the cart can be specified by contacting a member of our customer focused sales teams.

Workshop Cart 4-Drawer

A compact roller cabinet configuration for facilities that require a flexible mobile platform to work from. The perfect alternative to larger roller cabinets in workshops and production facilities with limited space.

- 1 shallow drawer, (110mm) with recessed handle release mechanism providing easy access to materials and tools.
- 3 deep drawers (150mm) with recessed handle release mechanism providing easy access to materials and tools with capacity for common powered driver tools and small diagnostics equipment
- Perforated panels with raaco SuperClip tool wall accessories for additional capacity
- Work surface with removable rubber mat, perfect as a workspace and for organizers when in use
- 4 low resistance, non-marking castors, 2 with brake, for mobility with a minimum of effort
- 4 corner mounted handles mounted for dextrous manoeuvrability

Part No.	Configuration	Height (mm)		Width (mm)	Depth (mm)	Weight (kg)	Max. capacity (kg)
		Work surface	Inc. back panel				
190428	1 x Shallow drawer 110h x 375w x 330d (mm) 3 x Deep drawers 150h x 375w x 330d (mm)	967	1157	495	480	29.0	125

Workshop Cart CarryLite 80 Combi

A classic utility cart configuration enhanced with raaco configurable organizers. Designed to provide core raaco organisable storage alongside capacity for larger equipment, power tools or diagnostic equipment. A utility cart configuration will resonate with automotive technicians and workshop engineers.

- 1 Deep Drawer (150mm) with recessed handle release mechanism providing easy access to materials and tools with capacity for common powered driver tools and small diagnostics equipment
- 2 recessed CarryLite80 5x10 compartments for flexible organised and removable materials and tools storage (CarryLites not included)
- 1 open compartment for larger tools and equipment, motors, pumps, small sub-assemblies, and battery boosters for example.
- Perforated panels with raaco SuperClip tool wall accessories for additional capacity
- 4 corner mounted handles mounted for dextrous manoeuvrability

Part No.	Configuration	Height (mm)		Width (mm)	Depth (mm)	Weight (kg)	Max. capacity (kg)
		Work surface	Inc. back panel				
190411	1 x Deep drawer 150h x 375w x 330d (mm) 2 x CarryLite 80 5x10 compartments 1 x Full aluminium shelf 240h x 425w x 325d (mm)	967	1157	495	480	21.5	125

Workshop Cart CarryLite 80

The perfect mobile workstation for facilities that require a flexible mobile CarryLite platform to work from. Configured with our range of inserts or organised with foam inserts, CarryLite organizers provide an interchangeable solution for tooling, discrete repair or manufacturing kits. Excellent as a mobile maintenance workstation, or a stores to cell transportation solution.

- 6 recessed CarryLite80 5x10 compartments for flexible organised and removable materials and tools storage (CarryLites not included)
- Perforated panels with raaco SuperClip tool wall accessories for additional capacity
- Work surface with removable rubber mat, perfect as a workspace and for organizers when in use
- 4 low resistance, non-marking castors, 2 with brake, for mobility with a minimum of effort
- 4 corner mounted handles mounted for dextrous manoeuvrability
- Lightweight aluminium construction

Part No.	Configuration	Height (mm)		Width (mm)	Depth (mm)	Weight (kg)	Max capacity (kg)
		Work surface	Inc. back panel				
190398	6 x CarryLite 80 5x10 compartments	967	1157	495	480	18.5	125

Workshop Cart CarryLite 80/55

CarryLite centric mobile workstation designed with greater capacity for smaller components. Configured with our range of inserts or organised with foam inserts, CarryLite organizers provide an interchangeable solution for tooling or routine maintenance kits. Excellent as a mobile maintenance workstation, or a stores to cell transportation solution.

- 3 recessed CarryLite80 5x10 compartments for flexible organised and removable materials and tools storage (CarryLites not included)
- 4 recessed CarryLite55 5x10 compartments for extra organisational capacity of smaller materials and components
- Perforated panels with raaco SuperClip tool wall accessories for additional capacity
- Work surface with removable rubber mat, perfect as a workspace and for organizers when in use
- 4 low resistance, non-marking castors, 2 with brake, for mobility with a minimum of effort
- 4 corner mounted handles mounted for dextrous manoeuvrability

Part No.	Configuration	Height (mm)		Width (mm)	Depth (mm)	Weight (kg)	Max capacity (kg)
		Work surface	Inc. back panel				
190404	3 x CarryLite 80 5x10 compartments 4 x CarryLite 55 5x10 compartments	967	1157	495	480	19.0	125

Workshop Cart 3-Shelf

A flexible transportation solution for parts, tools and materials with full width shelves. A design suitable for stock management, and the transportation of larger materials in storerooms and throughout manufacturing facilities.

- 3 full aluminium shelves, with a stepped front edge to keep content in place during transportation. A flexible storage solution also compatible with Pro bins. (Pro bins not included)
- Perforated panels with raaco SuperClip tool wall accessories for additional capacity
- Work surface with removable rubber mat, perfect as a workspace and for organizers when in use
- 4 low resistance, non-marking castors, 2 with brake, for mobility with a minimum of effort
- 4 corner mounted handles mounted for dextrous manoeuvrability
- Lightweight aluminium construction

Part No.	Configuration	Height (mm)		Width (mm)	Depth (mm)	Weight (kg)	Max. capacity (kg)
		Work surface	Inc. back panel				
190435	3 x Full aluminium shelves 160h x 425w x 325d (mm)	967	1157	495	480	20.0	125
