CARRYLITE LMS SYSTEM

## TABLE OF CONTENTS                    PAGE

# CarryLite Kitbox System

The CarryLite Kitbox System is a storage system comprising boxes with accessories, shelving units and trolleys for storage of several boxes. The system is versatile, lightweight and robust containing standard products as well as customer specific solutions which are made to order.

The highly regarded CarryLite boxes were launched in 1996 and have proven to be a bestseller and probably the most versatile and robust storage box ever made. Naturally the CarryLite box became the cornerstone of the new Kitbox System.

The CarryLite Kitbox System is a thought through system for organising workshops, assembly lines, maintenance & repair or similar workplaces, and is a highly usable system for everyone working with LEAN/5S principles.

# Major features
## Sandwich lid & Click´n grid

The double lid provides security and overview. It makes it possible to insert a description or layout of content, assembly instructions etc.

The Click´n grid ensures the inserts will remain in place once they are properly fixed in the bottom of the CarryLite box.

**PATENT PENDING**

---

Sandwich document lid for description or layout of content, instructions etc.

Click'n grid feature to fix the insert into the box.
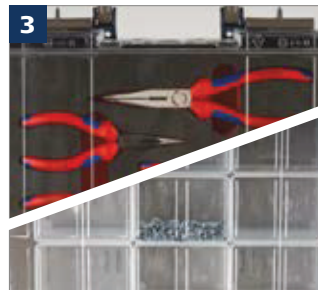

Optional lower lid-part. U-profile to ensure smaller parts remain in place or smooth surface for better visibility of content.

Fastener fixing holes for safety and security. The holes are 0,019 inches (5 mm) in diameter.

Smooth surface for easy labelling/identification.

RFID holder to hold RFID-Tag for tracking of box.

Red dots – open/close identification.

Colour ID-Tags for better identification purposes.

# CarryLite LMS

The CarryLite LMS kitboxes come in two different sizes and in two different versions.

The two sizes are called 4x8 and 5x10 and share the same height. The two different versions are standard colour (raaco blue) and FOD (fluorescent) colours.

Both versions are made of high grade polypropylene and polycarbonate.

The CarryLite LMS comes in two sizes and in standard and FOD versions.

# CarryLite Standard with Double Lid

The standard CarryLite with double lid comes in two sizes called 4x8 and 5x10 and in height 55 and 80 mm.

Choose between two different kinds of lid. - with or without U-profiles. Both types of lid are made of impact-resistant polycarbonate.

The raaco Sandwich Lid gives you the options of inserting instructions (e.g. assembly guide) for correct use of the contents. There are a number of ways creating security and overview.

# LMS inserts

The two different sizes of CarryLite LMS boxes can be configured to specific needs by use of 11 different sizes of inserts which ensures the content remains safe in the right location.

There are two different versions of the CA-inserts which look alike. Both are transparent but the FOD-version contains added fluorescent material for better visibility using black light (UV-light).

The range of CA-inserts can be fixed in the click'n grid at the bottom of the CarryLite LMS cases.

The inserts are made of polypropylene (PP) and tolerate a wide range of chemicals

4 of the 11 CA-inserts have reduced height and are therefore made especially for small parts.

U-profiles ensure smaller parts remain in place.

# Standard inserts

The two different sizes of CarryLite Kitboxes can be configured to specific needs by use of more than 16 different sizes of inserts which ensures the content remains safe in the right location.

Move any insert to where you want to use it. The transparent, high-quality plastic makes it easy to identify the contents and gives an overview when time is tight.

The inserts are made of polypropylene (PP) and tolerate a wide range of chemicals

**55-series** for CarryLite 55.
10 different sizes for choice of combination.

**80-series** for CarryLite 80.
6 different sizes for choice of combination.

The inserts and contents stay in place, thanks to the special fitting system.

The loose inserts also make it easy to get hold of even the smallest item.

# Foam inlay

Organising tools in a foam inlay inside a CarryLite Kitbox will not only protect the tools but also help in identifying missing tools before leaving the job.

raaco offers the opportunity to create customised foam inlay through an online web-enabled foam configurator.

Find more information on www.raaco.com

Your own combination of consumables, spare parts, screws, rivets, combined with the fitting tools encased foam, all well fitted into a CarryLite Kitbox

Choose between the colours black, light grey, blue, red, green and yellow combined with anthracite grey on top.

We use high quality PE foam without chemical foaming fabrics.

# Online box-configurator

Create your personal box in just a few steps with our innovative and user-friendly online box-configurator FOAMBOXX. Use our box-configurator to individually fill your personal box with inserts and /or customized foam-inserts.

Get started creating your customized CarryLite box at **www.foamboxx.com.** Please contact raaco on phone +45 54 88  84 00 or by mail@raaco.com to gain access to our online box-configurator FOAMBOXX – we will instantly create an account for you.

**1** Create a new project. Manage as many projects as needed in your project-list.

**2** Pick the box that best fits to your project needs from our wide range of available boxes.
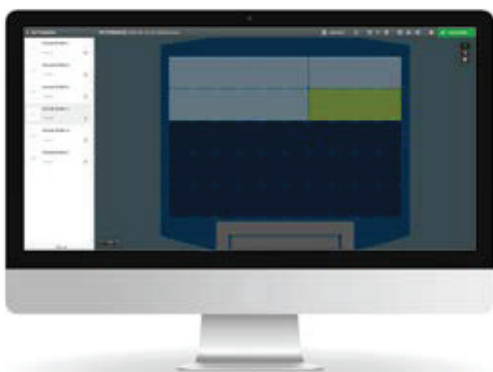

**3** Plan your box and add the inserts you need. Don´t worry about mix-ups: our editor will only offer inserts to fit your box.

**4** If needed, add a custom foam insert to your box and fill in all the tools needed from our database.

**5** Alternatively, use the FOAMBOXX scan-mat to add your own tools to the online box-configurators database.

**6** The project-list shows all your custom boxes including prices. Shortly after assig-ning, you will receive your custom box.

# Trolley and Depot

## Location Management System

Lightweight, robust, versatile and with excellent overview.

The CarryLite LMS System includes trolleys and depots for storage and organisation of multiple CarryLite boxes in one place.

raaco has 5 versions of trolleys and depots for different kinds of storage and organisational requirements. raaco also offers the option of custom made trolleys and depots.

All trolleys and depots are made of lightweight aluminum.
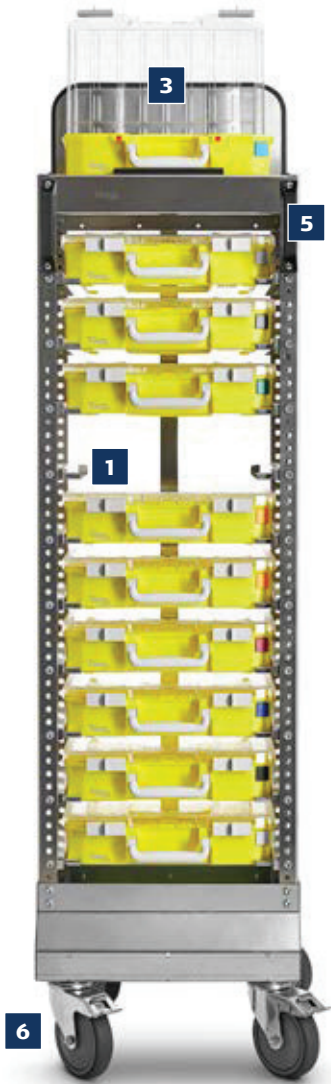

**1** Rails with stops keep CarryLites in place during transportation.

**2** Magnetic-lock holds the shelf in place when in collapsed position.

**3** Label holder for ID purposes.

**4** Two collapsible shelves to support 2 CarryLites in use.

**5** Two handles for easy manoeuvering.

**6** Four wheels with brakes ensure trolley remains in position, and strong bumpers (optional) to protect the surroundings.

# Accessories & spare parts

All products are designed according to DFD principles (Design for Disassembly) enabling replacement of broken parts - if needed.

You can either replace, change or add accessories to your CarryLite Kitbox System as needed.

For example, you can change a stationary depot to a trolley by simply replacing the "screw feet" with wheels – or the replaceable ID-tags in 9 different colours can be used for colour coding and labelling to ensure quick identification of the right CarryLite Kitbox and content.

RFID holders (passive) for the two sizes of CL-LMS boxes can securely hold RFID labels/tags free of dust etc. The RFID holders are available in a standard as well as in a FOD version.

BinFlag is a simple way for coding of the stock position and availability. It reduces stock checking times, RFID compatible and saves time on the workplace and provides overview and reduces errors.

With the Pull-Tight seals it is easy to secure the contents of the kitbox. Each Pull-Tight has its own code so it is easy to identify each kitbox.

raaco has specialised in developing the best, simplest storage systems for industry and professional use all over the world since 1956. Our approach is highly focused and simple. It's all about order. Not just for the multitude of components, tools and small items vital to production, but also in the mind. Order gives overview, control and reassurance, enhancing job satisfaction for everyone.

**Room for good ideas that last**

When the workplace is tidy, with all the important small items and accessories sorted into the right boxes and compartments, thinking clearly is easier. There's room to see things from a new angle and to achieve even better results. That's how we work ourselves at raaco. And that's why we can continue to develop new, innovative and detailed solutions that last.

**Design awards have to be lived up to**

raaco has been awarded a host of international and Danish awards for excellent industrial design over the years. Naturally, that's something we are proud of. They also have to be lived up to. That's why we are so particular, setting high standards for the durability, function and details of our systems. We always seek to maintain such standards with regard to ideas, the design itself and choice of materials.

**The environment in mind**

raaco is very concerned about the environment, and we go to a lot of trouble to ensure that product development and production is environmentally-friendly. What this means in practice is we work hard to minimize our impact on the world around us and our employees. This policy is expressed in the comfortable working environment in which our employees create robust, highly durable and environmentally-friendly solutions. This is to the benefit of everyone - including the environment.
